BESTEN[®]

Engineers & Consultants
India Private Limited

What Do We Do?

- * Design
- * Planning
- * Detailed Engineering
- * Procurement Support
- * Project Management
- * Commissioning & Qualification

FOR INDUSTRIAL PROJECTS

Why BESTEN ?

Core Competence in Industrial Projects

We offer single source, integrated, comprehensive design and project management solutions for industrial and commercial projects resulting in faster project delivery, minimum multi-disciplinary coordination, improved quality of deliverables and protection of intellectual property and process knowhow.

We have the resources, knowledge and experience of the construction industry to assist in developing the most basic ideas into workable designs, assess alternatives, understand the impact of these alternatives and provide comprehensive design solutions for projects entrusted to us.

Our team of multi-disciplinary professionals have unmatched knowledge, industry experience and proficiency to design, engineer and manage projects specifically tailored for manufacturing process. Our proven experience lends itself to facing the challenges associated with complex industrial projects.

Green Design

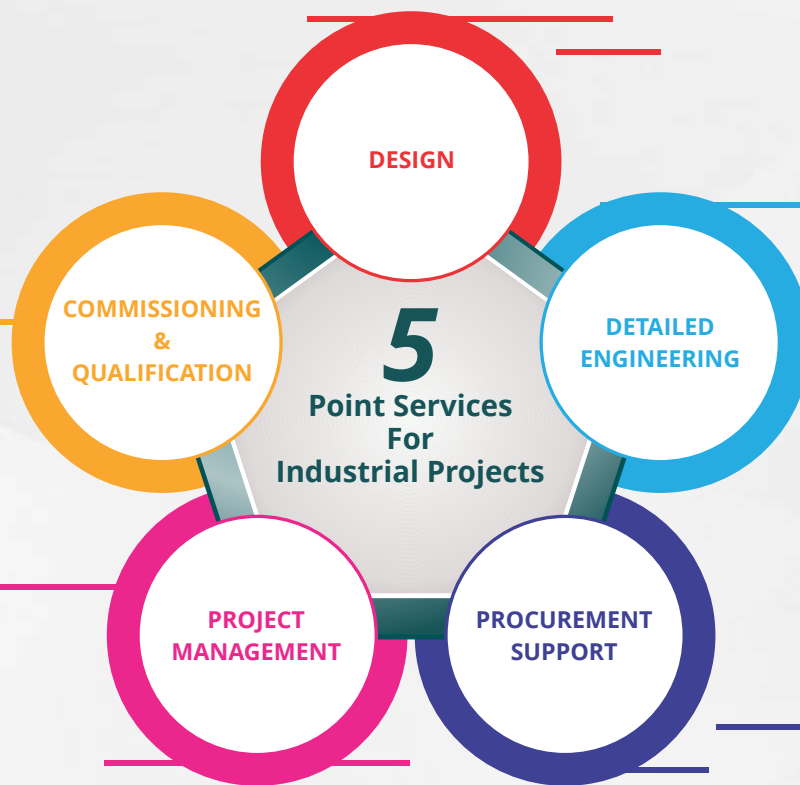

Sustainability and green design is fundamental to our design practice, ensuring that the projects are created not with "less bad" but with "more good"

We are committed to spread the awareness of sustainable or green design principles and the resultant decreased costs due to less raw material consumption and decreased long term energy costs which are becoming increasingly important with rising water and energy prices.

Added value Consulting Services

Unlike the traditional method of engaging separate consultants for each disciplines working on the project combined with separate project management consultants to manage the design consultants and the project, we manage and control the entire project from conception through Design, Detailed Engineering, procurement support and project management till the close out and handover of the project.

Total Design Philosophy

We believe in the philosophy of “Total Design” which implies that all design decisions shall be considered together, collaborated and integrated as a whole by a well organised and empowered team.

Close and Seamless relationship between Design and Construction

Single point responsibility of Design, Detailed Engineering, Procurement Support and Contract Administration

No Geographical Boundaries

We work across the length and breadth of India in addition to the SAARC and Middle East Countries through our design centres and project offices located in Chennai and Bangalore. We operate site offices at all locations where we handle projects for better co ordination and seamless work flow

Post Project Support

FTP Access to the client for project database and as-built drawings for 5 years from the date of virtual completion of the project.

Several Type & Category of Industrial Projects

- * Food Processing
- * Beverages
- * Breweries & Distilleries
- * Dairy
- * Sugar
- * Textile
- * Pharmaceutical
- * Surgical
- * Automobile Components
- * Tanneries
- * Paper & Glass
- * Petroleum & Gas
- * Foundries
- * Steel
- * Chemicals & Metals
- * Consumer Goods
- * Farm Equipment
- * Electronics
- * Engineering Industries

...and many more

SERVICES

- Pre Design Services
- Architectural Design
- Structural Design
- Civil Engineering Design
- Electrical Engineering Design
- Mechanical Engineering Design
- Fire Protection Engineering
- Piping Engineering
- Building Service Engineering
- Building Information Modelling
- Procurement Management
- Project Management
- Contract Administration
- Commercial Services

CLIENTS

Hyderabad:

Level 1, am@ 10,
MB Towers,
H No. 8-2-624/A/1,
Road No 10, Banjara Hills,
Hyderabad – 500 034.
